Tone-semitones in blocks

Thinking of each note or finger in relationship to other notes or fingers – rather than seeing each note in isolation – is one of the most important aspects of intonation. Checking notes against each other is one way in which this applies, for example tuning any stopped A² to the open A, or feeling F as the ‘leading note’ to G³. Another way in which it applies is in playing intervals between notes rather than the notes themselves (do not play D⁴, and then F⁴ - play a major third). Here we are concerned with feeling the four fingers in tone-semitone patterns, for example tone-tone-semitone, or tone-semitone-tone, and so on.

Example 1.

Basing this two-octave scale on a first finger C³, the tone-semitone patterns are:

To practise play the first finger on its own, and then place the other fingers on the string together, at the same time, in ‘blocks’. (The only fingers that will actually sound will therefore be the first and fourth fingers, the second and third being placed silently.) Afterwards the passage will feel more secure, the hand and fingers falling immediately into each new tone-semitone ‘setting’ without hesitation. Keep the first finger held down on the string as marked:

Example 2.

When a group of notes is not in consecutive order like a scale, make the tone-semitone pattern clear by rearranging the fingers in the order 1 – 2 – 3 – 4. Here, the groups within brackets fall into the following tone-semitone patterns:
Having played the first finger place the 2nd, 3rd and 4th fingers on the string at the same time (so that you actually play only the top note). Put the fingers down in-tune, in their correct tone-semitone patterns. Then play the four notes descending to check that they are in tune:

Also strengthen the feel of each tone-semitone group by playing lightly and quickly as follows:

Example 3.

The groups of notes in brackets fall into the following tone-semitone patterns:

Place the fingers together in blocks as in Example 2:

Example 4.

- Place the notes in brackets silently on the string, in tune. Place 4 – 3 – 2 together first, and then place the first finger (so that then all four fingers are on the string).
- Then play the notes fast, like grace-notes, stopping on the first finger.
- Keep the first finger down on the string each time until just before it is next needed.
